

Starkey's Mission

Starkey is dedicated to serving its customers by providing products and services for individuals with hearing impairment, allowing them to enjoy the quality of life's experiences. We strive to provide the "Human Touch" to hearing healthcare.

This is accomplished through operational excellence, product leadership and customer partnerships. We value these relationships and continue to provide the highest level of education, development and service to our employees, customer-partners and patients.

The leadership recognizes that contributions from employees create this future. We strive for high standards in the workplace and emphasize employee values in our daily activities.

Hearing Aid Research

Better today than
yesterday ... better
tomorrow than today.

Become a part of tomorrow's technology.

Research Participation

The Audiological Research team at Starkey Laboratories, Inc. is seeking individuals to participate in on-going research studies of new developments in hearing aid technology and digital sound processing.

Research studies are conducted several times a year and typically involve three to six visits over a four- to eight-week period. Visits are between a half hour and two hours long.

Participants evaluate new technology through laboratory evaluations and/or by wearing the research hearing aids in their everyday lives.

Research records are maintained in accordance with current privacy regulations. Involvement in research is voluntary; participants may withdraw at any time without prejudice.

By becoming involved in research, participants gain a better understanding of their own hearing loss, learn about advances in new technology and have the opportunity to share their opinions and experiences with us.

At the end of the study, participants are paid a stipend for their contribution and are required to return the research devices. Participants who wish to purchase hearing aids are referred back to their hearing healthcare professional.

On behalf of Starkey Laboratories, we want to extend our thanks and appreciation for your help in finding solutions for better hearing.
